

**Note: Contact MBG Lab for suitable sample type and collection method.**

- Label collection tubes with patient details.
- Collect sample (2-3 ml) from the patient in designated tubes.
- Place tube into Biohazard transport bags lined with absorbent material.

- Place the biohazard bag into another biohazard bag and seal well.
- Place the **requisition form** in the outer pouch of the biohazard bag.
- Place the bag on an ice pack in a transport box.
- **Call MBG Lab** and inform before transporting the samples. Transport to Collection Centre / Lab.

**Note:** The samples must be transported at 4°C and sent within 24 hours of sampling. (If storage / transport will exceed 24 hours freeze the sample at -20°C or lower - DO NOT THAW THE SAMPLE AFTER FREEZING).
